MANAGEMENT DISCUSSION AND ANALYSIS

Introduction

The financial year 2011-12 had come up with improvement in performance of your company.

Indian economy and its effects on your company

As the world is advancing into the future, plastic engineered solutions are becoming an arising need for the industries. The versatility of plastic pipe systems has made it a preferred choice for a wide range of applications for hot and cold water, energy, gas, conduit, sewerage and other industrial applications. The economic and environmental advantages of using the plastic pipes and fittings include resistance to corrosion and prevention of metal contamination thus ensuring hygienic and clean delivery, increased flexibility, durable, tough and light-weight material, leak-free joint fusion, easy installation, rehabilitation and greater life expectancy amongst others. Plastic pipes and fittings are the ideal products to suit the applications of today's domestic, commercial and industrial sectors.

According to All India Plastic Manufacturers Association (AIPMA), India's plastic consumption in 2010 stood at 9mn tonnes and has been growing at an annual average rate of 12%. With its true potential, consumption is all set to reach 12.5mn tonnes in 2012, which will make India the 3rd largest consumer of plastics by 2012 after US and China (expected consumption by then – USA: 39mn tonnes and China: 31mn tonnes). Further, the consumption is expected to reach 18.9mn tonnes by 2015.

As far as global consumption is concerned, Asia has been the world's largest consumer for several years, accounting for about 30% of global consumption. Next to Asia is North America with 26%, followed by Western Europe with 23%. Worldwide plastic consumption is expected to grow at an average rate of 5% until 2015.

The World economy is moving into a slower growth phase principally due to the problems faced by the European economy and bleak prospects of US economy. This has also slowed down Chinese and Indian Economy. In this situation, it was expected that the commodity prices may remain at a lower level for a longer period. Commodity prices came down to some extent. But, recently, Company is seeing reverse trend especially in the price of Crude Oil and commodity plastics. Inflationary conditions lead to increase in the prices of the raw material. From the low level reached in the market, fluctuations in the prices of Commodity plastics were between USD 50 to 100 per ton in the last 2-3 weeks. Indian economy is further adversely affected due to non-decisiveness by Centre and various State Governments on various pending issues which may lead the GDP growth to a lower level of around 6.5% during the year 2012-13.

Despite these adverse economic conditions, your Company Texmo Pipes And Products Limited could continue its growth momentum in FY 2011-12 as well and grew by 23.55 % in turnover and 14.14 % in EBIDTA terms.
